

RISK MANAGEMENT SERVICES

Expert security consulting to help organizations of all sizes reduce risk, achieve regulatory compliance, maintain business continuity and reach their security goals.

Our consultants are 100 percent security-focused and utilize proven consulting methods, based on ISO 17799 and National Security Agency Information Assurance Methodology (NSA IAM) best security practices.

Our team of security experts employs both proprietary and commercially available toolsets, the latest threat intelligence and advanced countermeasures to help build effective security programs that protect and enhance business operations.

Risk Identification

Penetration Testing

Real-life network attack simulation in which security experts attempt to penetrate a network mimicking the techniques used by malicious attackers. Determination of network vulnerabilities while demonstrating how attackers can significantly impact your business

Application Security Assessment

Identification of vulnerabilities in Web and custom applications. Targeted code review to provide solid recommendations for improving application security.

Application Penetration Test

Remote attack simulation in which security experts attempt to penetrate an application, mimicking the techniques used by malicious attackers. Identification and exploitation of application vulnerabilities to determine application security and accessibility of data

External Vulnerability Assessment

Identification of vulnerabilities in externally facing devices and manual exploitation to determine threat level.

Information Security Assessment

Comprehensive evaluation of an organization's security posture. Includes assessment of information security policies, procedures, controls and mechanisms as well as physical security, networks, servers, desktops and databases.

VoIP Assessment

Evaluation of VoIP infrastructure to assess its security state.

Wireless Security Assessment

Assessment of wireless network environment to test the security of the network design and implementation.

Social Engineering Assessment

Attempts to discover sensitive information or to access sensitive areas by acting as a trusted employee or untrusted user.

Regulatory Specific Assessments

Assessment of the gaps between the current security state and the achievement of compliance with industry and government regulations, including (but not limited to):

- Federal Financial Institutions Examination Council (FFIEC)
- Federal Information Security Management Act (FISMA)
- Gramm-Leach-Bliley Act
- Health Insurance Portability and Accountability Act (HIPAA)
- Payment Card Industry (PCI) Data Security Standard
- Sarbanes-Oxley
- Supervisory Control and Data Acquisition (SCADA)

RISK MANAGEMENT SERVICES

Expert security consulting to help organizations of all sizes reduce risk, achieve regulatory compliance, maintain business continuity and reach their security goals.

Incident & Security Response Services

Incident Response Planning

Development of a security incident response plan to ensure preparedness in the event of a security incident.

Emergency Response Service

Immediate attack response 24x7x365 to stop attacks in progress and minimize their impact. Prepare for, manage and respond to a computer security incident. On-site security workshops to improve incident readiness and security posture. Available as subscription service or as on demand service

Forensic Analysis Service

Provides computer forensic analysis, discovery and litigation services to help find and prosecute perpetrators of information security breaches. Detailed forensics to find and prosecute perpetrators. Available as subscription service or as on demand service

Staff Augmentation and Support

Provides cost-effective security optimization with minimal impact on normal staff operations by offloading critical security management tasks from in-house staff resources. Security experts act as an extension of in-house resources.

Security Awareness Program

Education for employees about best security practices and security policies.
